

**REMARKS**

In the Office Action mailed December 28, 2005, claims 1-45 are pending and are subject to restriction under 35 U.S.C. §121.

Restriction is required to one of the following:

- 1) Claims 1-15, drawn to a reagent for mass spectrometric analysis;
- 2) Claims 16-18, drawn to composition including **[i.e., a reagent according to claim 1 including]** a mixture of two tag molecules;
- 3) Claims 19-27, drawn to a kit **[comprising the reagent of claim 1]**; and
- 4) Claims 28-45, drawn to a method of identifying one or more proteins **[using a reagent according to claim 1]**.

Applicants hereby elect Group 1, i.e., claims 1-15 for further examination in this application, with traverse. An inspection of all of the claims reveals that each claim includes as a part thereof the requirements of claim 1. Therefore, if claim 1 is patentable, all of the claims are patentable. Applicants respectfully submit that restriction is improper under this factual circumstance. At most, an election should be required and, if claim 1 is patentable or if all of the claims are amended to include any recitations in claim 1, all claims should be allowed in the present application.
